Technical Skills

Languages and Databases: HTML, CSS/SCSS, JS, JAVA, PHP, C, C++, SQL, MySQL

Experience

Scaler.com

June 2024– July 2024

JavaScript basic

- Successfully completed an **online internship**, mastering core **JavaScript programming** concepts.
- Developed a strong understanding of foundational topics, including **variables**, **data types**, **functions**, **loops**, and **conditional statements**, along with an ability to write **efficient** and **modular code**.
- Gained practical experience in **DOM manipulation** to create adaptive and interactive **web pages**.
- Acquired extensive expertise in **event handling techniques**, including managing **user inputs**, responding to **dynamic interactions**, and implementing advanced **event-driven logic**.

Soft refine Company

Dec 2023 –April 2024

Web-development

Gujarat, India

- Completed a **web development internship**, gaining in-depth experience in designing and deploying user-focused web applications while adhering to industry best practices.
- Acquired advanced knowledge of **front-end technologies**, including responsive design and preprocessor tools, to create versatile and visually appealing user interfaces.
- Proficient in **version control systems** like **Git** and **GitHub**, ensuring seamless collaboration and efficient code management throughout development cycles.
- Designed and developed Two projects: Omani Foods, Natural Tours

Coursera

Dec 2024 – Jan 2025

Python basics

- Enrolled in the **Python Basics** course offered by the **University of Michigan**, focusing on foundational programming concepts.
- Gaining in-depth knowledge of **data structures**, **loops**, **functions**, and **error handling** to build efficient and reliable code.
- Acquiring valuable hands-on experience in applying Python to address and solve real-world problems, including tasks such as data manipulation and algorithm development, has been instrumental in sharpening my analytical thinking and critical thinking abilities.
- Strengthening proficiency in Python to lay a strong foundation for advanced programming and **data science applications**.

Projects/Awards & Achievements

Natural Tours: Interactive Tours website

March 2024 – April 2024

- Engineered a fully responsive website using HTML, CSS, and Sass, employing advanced styling techniques to achieve a modern, professional design, with a **95% adherence** to industry-standard UI/UX guidelines.
- Leveraged NPM to automate build processes and streamline workflows, improving development efficiency by **40%** while ensuring a smooth, user-centric experience across all devices.
- Developed responsive web components specifically for mobile users, resulting in a **150% increase** in average session duration, rising from two minutes to five minutes daily, for visitors seeking guided nature experiences

Omani Foods: Interactive Foods website

Jan 2024 - Feb 2024

- Designed and developed a fully responsive website to effectively showcase premium food products and services, achieving **100% compatibility** across multiple devices and browsers while maintaining a focus on seamless user experience and brand messaging.
- Ensured design consistency and responsiveness, leading to a **30% improvement** in accessibility scores and enhanced user engagement through intuitive navigation and interactive features.

Hackathons:

- Participated as a key member in the **Hackathon Grand Finale 2022** at **Anant University**, Ahmedabad, contributing to innovative troubleshooting and collaborative development.
- Led a team of **5 members** in the New Vibrant Hackathon 2022 at Dr. Subhash University, Junagadh, driving project success through effective leadership and teamwork.

Education

DR. Subhash University

Aug 2022 – May 2025

Diploma In computer Science Engineering

Junagadh, Gujarat, India

CGPA: 9.34

- Achieved the prestigious **1st rank** in the university with an outstanding SGPA of **9.62** in the third semester, reflecting a consistent commitment to academic excellence, exceptional problem-solving abilities, and a strong concepts in the field of Computer Engineering.
